

SELF-CERTIFICATION FORM
RECOMMENDED MINIMUM PERFORMANCE STANDARDS FOR VINYL SWIMMING POOL LINERS – IN-GROUND – CFFA-P-101G DECEMBER 2022

Please complete this self-certification form declaring an accredited test lab has confirmed the product(s) listed meet(s) the CFFA-P-101 standard.

Company Name: _____
Address: _____
City, State, Zip: _____
Contact Name: _____
Contact Email Address: _____
Phone Number: _____

Test Laboratory: _____
Test Laboratory Accredited to (check one)*: ISO 17025 IATF 16949
Contact: _____
Contact Email Address: _____

**An accredited lab is one that has been accredited to ISO 17025 or IATF 16949 and whose accreditation is in effect when the required tests are made and reported. In performing the required tests, an accredited lab must adhere to CFFA’s standard conditions of test methods as outlined in the VPL standard.*

PLEASE NOTE: The program covers vinyl films which are used as in-ground swimming pool liners when tested in accordance with CFFA-VPL-101P. Certification will be based on construction at the product type/gauge and base film (color) level. A product type/gauge (mil) is defined as minimum of 20 mil. Base film is defined as the color. If a participant changes the performance characteristics, the participant may not use the certification mark for the changed product unless and until the participant notifies CFFA in writing and resubmits appropriate documentation that the changed product meets the standard. (Refer to CFFA-VPL-101P – Taber Test Method. If topcoat & grammage [g/m²] are the same for each color and product type/gauge, the abrasion/taber performance is considered to be equal; requiring for only 1 print pattern to be tested for each color and product type/gauge.) If other print patterns fail the test, the certification can still be challenged.

CERTIFIED PRODUCT SUBMISSION INSTRUCTIONS:

- Please complete this section exactly as you would like it to appear on the certified product website listing.
- Please submit one form per base film (color).
- In addition to inserting each product image below, please submit each product image file using the following file naming system:
CompanyName_BaseFilmColor_ProductName. Product image spec size: 800x800 px; Resolution: 72ppi.
